

DATASET DESCRIPTION

Phenological observations of grape vine from beginning of sprouting to falling of leaves (immediate reporters, historical)

Version v007

Cite data set as: Phenological observations of grape vine from beginning of sprouting to falling of leaves (immediate reporters, historical), Version v007

Dataset-ID: urn:x-wmo:md:de.dwd.cdc::obsgermany-phenology-immediate_reporters-vine-historical

ABSTRACT

The phenological data provide an overview of plant development in Germany over the year. The data are collected by volunteer observers and reported to DWD.

DATASET DESCRIPTION

Parameter	Weinreben, Wein
Temporal coverage	1980-01-01 - 2012-12-31

Spatial coverage	Germany																																												
Projection	WGS 84 (EPSG:4326)																																												
Format description	Each file PH_Sofortmelder* contains the observation of a certain species (e.g., elder), with fixed object_id (e.g., 129). The rows are sorted according to Stations_id, reference year, phase_id. Each row corresponds to one observation. The list with all phenological stations and corresponding meta-data can be found here: https://opendata.dwd.de/climate_environment/CDC/help/PH_Beschreibung_Phaenologie_Stationen_Sofortmelder.txt .																																												
application schema	<p>csv dialect description</p> <table border="0"> <tr> <td>delimiter</td> <td>line terminator</td> <td>header</td> <td>quote char</td> </tr> <tr> <td>;</td> <td>\\r\\n</td> <td>true</td> <td>"</td> </tr> </table> <p>csv content description</p> <table border="0"> <thead> <tr> <th>column name</th> <th>description</th> <th>type</th> <th>format</th> </tr> </thead> <tbody> <tr> <td>Stations_id</td> <td>DWD Station ID</td> <td>VARCHAR2</td> <td></td> </tr> <tr> <td>Referenzjahr</td> <td>year corresponding to phase</td> <td>NUMBER</td> <td>YYYY</td> </tr> <tr> <td>Qualitaetsniveau</td> <td>quality flags</td> <td>NUMBER</td> <td>numerical code</td> </tr> <tr> <td>Objekt_id</td> <td>identifier of the phenological object</td> <td>NUMBER</td> <td>990</td> </tr> <tr> <td>Phase_id</td> <td>identifier of the phenological stage</td> <td>NUMBER</td> <td></td> </tr> <tr> <td>Eintrittsdatum</td> <td>date of observation</td> <td>NUMBER</td> <td>YYYYMMDD</td> </tr> <tr> <td>Eintrittsdatum_QB</td> <td>quality flag</td> <td>NUMBER</td> <td></td> </tr> <tr> <td>Jultag</td> <td>day of the year</td> <td>NUMBER</td> <td>DDD</td> </tr> </tbody> </table>	delimiter	line terminator	header	quote char	;	\\r\\n	true	"	column name	description	type	format	Stations_id	DWD Station ID	VARCHAR2		Referenzjahr	year corresponding to phase	NUMBER	YYYY	Qualitaetsniveau	quality flags	NUMBER	numerical code	Objekt_id	identifier of the phenological object	NUMBER	990	Phase_id	identifier of the phenological stage	NUMBER		Eintrittsdatum	date of observation	NUMBER	YYYYMMDD	Eintrittsdatum_QB	quality flag	NUMBER		Jultag	day of the year	NUMBER	DDD
delimiter	line terminator	header	quote char																																										
;	\\r\\n	true	"																																										
column name	description	type	format																																										
Stations_id	DWD Station ID	VARCHAR2																																											
Referenzjahr	year corresponding to phase	NUMBER	YYYY																																										
Qualitaetsniveau	quality flags	NUMBER	numerical code																																										
Objekt_id	identifier of the phenological object	NUMBER	990																																										
Phase_id	identifier of the phenological stage	NUMBER																																											
Eintrittsdatum	date of observation	NUMBER	YYYYMMDD																																										
Eintrittsdatum_QB	quality flag	NUMBER																																											
Jultag	day of the year	NUMBER	DDD																																										
Quality Information	<p>The QUALITAETS_NIVEAU (QN) shows the quality control procedure applied for a data report (of several parameters) for a certain reporting time.</p> <p>QN = 1 : only formal control; QN = 2 : controled on individual criteria; QN = 7 : second control done, before correction;</p> <p>The QUALITAETS_BYTE (QB) denotes whether the value was objected to and/or corrected.</p> <p>QB = 0 : not checked/not flagged; QB = 1 : had no objections; QB = 5 : doubtful;</p>																																												

DATA ORIGIN

A fixed observation area is assigned to every phenological observer. Each observation area has a station-id assigned by the network administration. The observer registers the first detected resp. the latest occurrence of determined growth stages independent of plant specimen, site or field. The observation were reported immediatly online or by phone and archived in the climate data bank of DWD.

VALIDATION AND UNCERTAINTY ESTIMATE

During the operational handling of phenological data each year a spatial quality control has been performed. Each year 1 - 2 % of the data are flagged to be wrong. Causes could be confusion of phases.

UNCERTAINTIES

Factor for uncertainty is the change of the observer.

CONSIDERATIONS FOR APPLICATIONS

BBCH code see [phase definition;https://opendata.dwd.de/climate_environment/CDC/observations_germany/phenology/immediate_reporters/vine/historical/PH_Beschreibung_Phasedefinition_Sofortmelder_Weinrebe.txt].

ADDITIONAL INFORMATION

English and Latin names of plants are listed in [PH_Beschreibung_Pflanze.txt;https://opendata.dwd.de/climate_environment/CDC/help/PH_Beschreibung_Pflanze.txt]. For the English name of the phase see [PH_Beschreibung_Phase.txt;https://opendata.dwd.de/climate_environment/CDC/help/PH_Beschreibung_Phase.txt]. According to experience, at some sites a few plant species are not, not continually or only partly observed. From 1991 (West Germany)/ 1992 (East Germany) a modified observation programme was introduced, see [PH_Beschreibung_Phaenologie_Besonderheiten_Zeitreihen.txt ;https://opendata.dwd.de/climate_environment/CDC/help/PH_Beschreibung_Phaenologie_Besonderheiten_Zeitreihen.txt]. When using phenological data, it is advisable to use several stations characteristically of a natural area or natural area group. In this way, the data have less gaps and the specifics of a single station are less prominently influencing the results. The classification of natural areas and natural area groups used by Deutscher Wetterdienst (DWD) for phenological data is based on the map *Naturräumliche Gliederung und Waldverbreitung* (Meynen und Schmithüsen, 1953-1962), see also [Handbuch der naturräumlichen Gliederung Deutschlands;https://de.wikipedia.org/wiki/Handbuch_der_natur%C3%A4umlichen_Gliederung_Deutschlands]. Observation criteria for current pheno phases are defined in the [instructions for observers; http://www.dwd.de/DE/klimaumwelt/klimaueberwachung/phaenologie/daten_deutschland/beobachtersuche/beobachteranleitung.html].
