

DATA SET DESCRIPTION

Historical dataset: Monthly mean of vapour pressure for stations worldwide

Version qcV002

Cite data set as: DWD Climate Data Center: Historical dataset: Monthly mean of vapour pressure for stations worldwide, version qcV002, 2017.

INTENT OF THE DATASET

Observations had been collected from worldwide CLIMAT stations, and had originally been provided by the respective National Weather Services. The data comprise the full time series as far as available in the database of DWD, and is quality controlled by DWD for climatological and climate related applications.

POINT OF CONTACT

Deutscher Wetterdienst
CDC - Vertrieb Klima und Umwelt
Frankfurter Straße 135

Fax.: + 49 (0) 69 8062-4499
Mail: klima.vertrieb@dwd.de

DATA DESCRIPTION

Spatial coverage global

Temporal coverage 01.01.1968 - 31.12.2014

Temporal resolution monthly

Format(s) The names of the data sets start with the station number, followed by the start (year, month) and the end of the data set (e.g. 01001_200801_201412 means station 01001 = Jan Mayen from January 2008 to December 2014). In the data set the year is followed by the 12 monthly means. For information about station numbers, stations and their location use the station list: https://opendata.dwd.de/climate_environment/CDC/help/stations_list_CLIMAT_data.txt

Parameters The mean vapour pressure is given for each month of the year, each row covers a year.

Jahr	year
Jan	mean vapour pressure in January hPa
Feb	mean vapour pressure in February hPa
Mrz	mean vapour pressure in March hPa
Apr	mean vapour pressure in April hPa
Mai	mean vapour pressure in May hPa
Jun	mean vapour pressure in June hPa
Jul	mean vapour pressure in July hPa
Aug	mean vapour pressure in August hPa
Sep	mean vapour pressure in September hPa
Okt	mean vapour pressure in October hPa
Nov	mean vapour pressure in November hPa
Dez	mean vapour pressure in December hPa

Quality information not available

DATA ORIGIN

National Meteorological Services

VALIDATION AND UNCERTAINTY ESTIMATE

The quality control includes: Check of internal consistency of the data in a report, check against climatological thresholds, comparison with values generated from the synoptic network as well as an environmental check.

CONSIDERATIONS FOR APPLICATIONS

This are data which span the historical time series, and where the full quality control had been completed. For extension to more recent years, see directories ../recent/.

REVISION HISTORY

The data are updated in approximately annual intervals. This document is maintained by the Marine Climate Monitoring Division of DWD, last edited 19.12.2018.
